Il Gruppo Policlinico di Monza

"Policlinico di Monza" is a private health care provider which furnishes complete management of general hospital activities, from functional duties to financial duties. Policlinico di Monza has a code of values which reflects its company mission, operating as an ethical company.

The hospital was founded in 1993 with the acquisition of Eporediese Clinic. Since then, the Group, thanks to a harmonious synthesis between developmental policy and company consolidation, purchased and developed the following hospitals:

Policlinico di Monza
San Gaudenzio Clinic in Novara
Città di Alessandria Clinic in Alessandria
Salus Clinic in Alessandria
Santa Rita Clinic in Vercelli
Eporediese Clinic in Ivrea
La Vialarda Clinic in Biella
Clinic Valle d'Aosta
Centru Cardiovascular in Bucarest

As of 31 December 2013, the Group comprised a workforce of about 2.970 staff, 1.049 bedspaces and an annual turnover of approximately € 242.998.154,13.

THE "POLICLINICO DI MONZA" GROUP

POLICLINICO DI MONZA

Policlinico di Monza is the main hospital of the Group where you will find the highest level of medical and surgical expertise. Of particular importance, are the outstanding heart surgery, cardiology, orthopaedics, neurosurgery and rehabilitation activities carried out.

Each of Policlínico di Monza's departments houses a university department – for example, the Cardiology Department headed by Professor Giuseppe Specchia works with the University of Pavia; the Orthopaedics Department headed by Professor Francesco Pipino works with the University of Genova; the Ophthalmology Department headed by Professor Stefano Miglior works with the University of Milano-Bicocca; and the Rehabilitation Department works with the University of Milano-Bicocca. Policlínico di Monza accommodates the university program 'Bachelor of Physiotherapy' directed by Professor Cesare Cerri.

THE "POLICLINICO DI MONZA" GROUP

Policlinico di Monza offers the best electromedical systems available on the market, particularly within the Diagnostics Imaging Department, headed by Prof. Toufic Khouri.

The hospital has two distinct radiology capacities: one for hospitalised patients only, and the other, exclusively for outpatients' services.

During 2011 were installed TC 750 Veo 128 slice GE and the MR 450 Short Wide Bore 1.5 Tesla GE.

As of 31 December 2013, the hospital was structured as follows:

Total area (sqm)	140.050
Indoor area (sqm)	33,500
Bedspace	238
Workforce staff	733
Turnover 2013	€ 73.817.059,00

Emergency Room

As of May 2013, Monza General Hospital's Emergency Room became six years old, and during last year of activity 16.647 patients were accepted with 1.524 of those admitted.

Emergency room

Breast Unit

In 2009 the Policlinico di Monza has established the Breast Unit which encompasses all the Departments and Specialty Units involved with the care of the various forms of the pathology of the breast, together with the most modern equipment for their diagnosis and treatment.

The institution of a Breast Unit within a complex health care delivery structure like the Policlinico di Monza represents both a need and a challenge.

THE "POLICLINICO DI MONZA" GROUP

A need, because it represents the natural evolution of the ever-improving medical and technological development. In fact, the Policlinico di Monza has instituted a interdisciplinary team of specialists made up of experienced surgeons, oncologists particularly interested and informed about the most recent therapeutic advancements; radiotherapy specialists whose professional interest has always been the radiation therapy of breast pathology; plastic surgeons aware of the problems and especially informed about the most advanced techniques for the reconstructive procedures of the breast. Another opportunity offered by the Breast Unit is the reduction of medical errors: group discussions represent a valid method of control of therapeutic decisions and markedly decrease the chances of error. Discussions also imply the update and the interchange of information with resultant improvement of the scientific quality of all members of the group.

Mammography System

Istituto di Oncologia

Istituto di Ricovero e Cura ad Alta Specializzazione

Institute of Oncology

In 2010 the Policlinico di Monza has established the Institute of Oncology and has appointed as its Clinical and Scientific Director Professor Emilio Bajetta, formerly Chairman of the Department of Medical Oncology of the National Tumor Institute of Milan and Past President of the Italian Association for Medical Oncology of which he was a founding member.

The Institute of Oncology is characterized as a centre of excellence capable of providing all the measures that are necessary in order to be able to manage complex oncological situations.

Prof. Emilio Bajetta is the Director of the Institute of Oncology at Policlinico di Monza

The Institute of Oncology is connected with the Units of Internal Medicine, General Surgery, Urology, Neurology, Neurosurgery, Plastic Surgery and the Departments of Diagnostic Imaging, Pathology, Gastrointestinal Endoscopy, Radiation Therapy, Psychology and the Breast Unit.

The Institute of Oncology is therefore a structure capable of providing excellent health care services in the fields of diagnosis, therapy and psychological support to the patient.

The Department of Diagnostic Imaging, makes use of 3 Magnetic Resonance, 3 Computerized Axial Tomography, 3 digital Mammography, 11 multidisciplinary ultrasound scanners.

The Institute of Oncology utilizes the Department of Histology and Pathology that performs Histopathologic and Immunohistochemical analysis and with the Department of Gastrointestinal endoscopy that possesses 3 videocolonscopic and 3 gastroscopic endoscopes of the most recent generation.

The Institute of Oncology comprises all the Surgical Units, including General Surgery, Thoracic Surgery, Neurosurgery, Urology, Plastic Surgery.

The Unit of Medical Oncology has 14 beds and 10 technical stations for the administration of chemiotherapeutic drugs.

The Department of Radiation Therapy of the Institute of Oncology of the Policlinico di Monza has the most modern equipment, in particular 2 Linear Accelerator, and 2 Hyperthermia cancer treatment systems

Further, there is the possibility of utilizing the Physiokintetic Service of the Functional Rehabilitation Center for the carrying out lymphatic drainage.

The Institute of Oncology has a Psychology Service capable of following the patient during the entire course of time of the diagnosis and cure of the illness.

THE "POLICLINICO DI MONZA" GROUP

Linear Accelerator

Besides the clinical activity, the Institute of Oncology of the Policlinico di Monza pursues an activity of research. In particular, Professor Emilio Bajetta will support the research activity through the ITMO Group (Italian trials in Medical Oncology) that engages in the execution of multicentre clinical trials designed to verify the therapeutic efficacy of experimental drugs.

VALLE D'AOSTA CLINIC

Valle D'Aosta Clinic is the leading centre in the region dedicated to rehabilitative care, neurological and orthopaedic surgery.

The institute, located at the gateway to Aosta, atop the hill of Saint Pierre, is surrounded by 9,000 square metres of parkland, ensuring peace and well-being especially for patients requiring prolonged periods of hospitalization.

In conjunction with traditional therapies, medical personnel use the most advanced methods, making use of sophisticated medical equipment, in order to offer the patient the best recovery of neuro-motor functions.

The flagship of the centre is its therapy pool, where patients can undergo hydrotherapy. Designed and manufactured using the latest technologies, it is equipped with handling systems which make the pool accessible for the treatment of patients with major disabilities.

THE "POLICLINICO DI MONZA" GROUP

Therapy pool

The hospital's rehabilitation centre caters for patients:

- Undergoing orthopaedic procedures
- With lower limb amputations awaiting arthroplasty
- Suffering from multiple trauma, for example following road accidents
- With neurological disabilities and complex multifactor aetiology

Rehabilitation gym

THE "POLICLINICO DI MONZA" GROUP

Valle d'Aosta Clinic was specifically established to fulfil patients' needs. In addition, it has been built in accordance with the latest "green technologies".

The building has three floors, two of which are dedicated to hospitalization, and one located partially below ground level.

As of 31 December 2013, the clinic was structured as follows:

Total area (sqm)	17.097
Indoor area (sqm)	8.056
Bedspaces	80
Workforce staff	102
Turnover 2013	€ 6.520.560,00

1. Hospitalization Services

Diagnosis and Care Activities:	bedspaces
Rehabilitation	64
Orthopaedics	13 (2 Day surgery)
Intensive care	(3)
Total	80

2. Specialist Diagnostic and Care Services

Imaging Department

- Computerized Axial Tomography (T.A.C.) Lightspeed Ge Medical System
- Portable X-Ray Philip Practix 160
- X-Ray Proteus Ge Medical System
- Mobile fluoroscopy system Brivio 850 Ge Medical System
- Multi-Disciplinary ultrasound scanner Mylab 25 Gold Esaote

Rehabilitation

- N.3 KINETEC Prima Advance s2
- Appliance for neuromuscular stimulation Alpine Biomed Clavis TM
- Runner Tapis Roulant
- Reck Ergometer motomed vivamed 2 complet
- Enraf Nonius Sonar therapy Sonopuls
- EME appliance for magneto therapy Magnetomed
- EME appliance for radar therapy RT 250 Digital
- Rimec appliance for passive rehabilitation Fisiotek
- N.2 Nihon Koden Electro cardiograph CARDIOFAX M
- Defibrillator Philips XL
- Okeo water trekking

- Okeo Aquabike basic
- N.2 Okeo Aquaflaps
- Okeo Cargo plus with wheels
- N.3 Okeo Hydrostep Europe
- Fisiotek double electric bed bobath
- N.3 Electro stimulator Elettronica Pagani ET 20 Plus
- N.2 Atala cycle ergometer CL160 Ligie
- Cycle ergometer Carnielli Magnetic Cyclette Hand Pulse
- N.4 Fisiotek electronic bobath bed

Laboratory Analysis

- Clinical Chemistry
- Haematology

Operating Blocks

- Block A: 2 Operating Rooms

3. Statistical Data for Valle d'Aosta Clinic in 2013

Hospital admissions	1.546
---------------------	-------

THE "POLICLINICO DI MONZA" GROUP

SPITALUL MONZA, CENTRU CARDIOVASCULAR, BUCAREST
